
SwiftUI interface
Ask: answer, sentences, versions, chats
Inspector: verify, evidence, rewrite
Library with preview
Stats and audit log
Core (Swift, no dependency on the engines)
Session: native answer → verification on request → rewriting on request
Policy and threshold τ
Chats (JSON), audit log (JSONL)
ports
Retriever
Generator
Verifier
Attributor
LLM judge
SQLite FTS5 (BM25) + bge-small (MLX)
Generator Qwen2.5-3B-Instruct 4-bit
GroundOne 3B: 8-bit base + LoRA adapter, marked prompt, A/B/C readout, calibration and τ
weights
LLM judge: same base, adapter removed, B0a prompt
MLX engines in one process; GPU calls serialised
